SUMMARY

Enthusiastic and motivated learner with a strong interest in software, cloud and web development. Possesses solid communication, problem-solving, and teamwork skills, along with a quick ability to adapt to new technologies. Passionate about creating efficient, user-friendly, and visually appealing digital solutions. Committed to continuous learning, professional growth, and contributing effectively to organizational success.

TRAINING EXPERIENCE

Cloud Apprenticeship, Adex International

Aug 2024 - Sept 2024

- Gained basic experience in AWS services, including EC2, S3, Lambda, and VPC.
 - Learned to integrate security measures such as configuring AWS security groups, setting up Identity and Access Management (IAM) roles following the principle of least privilege.
-

EXPERIENCE

.NET Intern, Easy Software

July 2025 - Oct 2025

- Developed and maintained web applications using ASP.NET Core, C#.
 - Assisted in designing and implementing RESTful APIs for backend services.
 - Integrated SQL Server database and implemented CRUD operations
 - Participated in daily stand-ups, version control using Git, and testing with Postman.
-

TECHNICAL SKILLS

- Oracle Database: Basic knowledge of running SQL queries and executing commands in Oracle environment.
 - Cloud Platforms: AWS (Certified Solutions Architect – Associate)
 - Programming: C#, Java (Basic), Python (Basic), HTML/CSS and java script
 - Basic knowledge on project management: Proficient in strategic planning, Agile/Scrum methodologies, risk management, stakeholder communication
 - Data Analysis: Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA), Statistical Testing
-

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (2024)**
 - **AWS Academy Cloud Foundations (2024)**
 - **AWS Academy Machine Learning Foundations (2024)**
 - **AWS Academy Data Engineering (2024)**
 - **AWS Academy Machine Learning For Natural Language Processing (2024)**
 - **Summer Industry Enrichment in Data Structure and Algorithms (2025)**
-

EDUCATION

BSc (Hons) Computing

2023-Present

Islington College

PROJECTS

- **Blog Management API (ASP.NET Core, C#, SQL Server):** Developed a modular blog management API handling categories, tags, and posts with validation, role-based control, and structured response codes.
GitHub Link: <https://github.com/SimankaPaudel/LoginRegister.git>
- **To-Do List Management API (ASP.NET Core, C#, SQL Server):** Developed a To-Do List Management API that allows users to manage daily tasks with CRUD operations.
- **Quiz App(ASP.NET Core, C#, SQL Server):** Developed an interactive Quiz Management System that allows admin users to create and list questions, create rooms and play between different rooms in real time using web sockets and participants to attempt quizzes and view results in real time.
- **Music Playlist Manager(Python, OOP, Linked Lists, Stacks, Queues, Recursion):** Built a CLI-based music player system using Python to manage playlists, playback queues, and listening history, demonstrating data structure and algorithm applications in real-world scenarios.
GitHub Link: <https://github.com/SimankaPaudel/MusicPLaylist.git>
- **Responsive Website Design:** Collaborated with a group to design and develop the front-end of a responsive website using HTML, CSS, and JavaScript.
- **Basic UX/UI Design Project:** Designed a user interface and wireframe as a part of a coursework project.
- **Python Project:** Developed a Python application to visually represent plots for customers and generate bills for purchases.
- **NYC 311 Service Request Analysis:** Cleaned and analyzed NYC 311 data to explore complaint patterns, response times, and location-based trends. Performed statistical testing and visualized key insights for reporting.
- **Smart Car Parking System Prototype:** Developed a working prototype that demonstrated the feasibility of an automated parking solution, improving space utilization.
- **Full Stack Web App:** Developed a dining reservation system with user/admin login, booking, payments, menu management, and reporting. Implemented secure authentication, session handling, and database CRUD operations using Java-based MVC architecture.
GitHub link: <https://github.com/SimankaPaudel/ContinentalBhansa2.git>
- **Inventory Management System:** Global Tech Corporation: Redesigned a failed IMS by developing WBS, Gantt chart, use case models, class/sequence/activity diagrams, and 15+ UI prototypes. Proposed Agile-based architecture, design patterns, and a complete development, testing, and maintenance plan.
